Professional Profile

Backend engineer with 12+ years of commercial experience in developing web services, APIs, and internal business systems. My current primary focus is PHP (Laravel, Symfony) and Go; I also have earlier commercial experience with Symfony, as well as additional experience with Go, Ruby, Elixir, and Erlang. Experienced in REST APIs, SQL optimization, indexing and caching, unit testing, code review, legacy stack modernization, and migrating selected services to Go.

Key Skills

- **Main backend languages:** PHP (Laravel, Symfony) and Go
- **Data bases:** PostgreSQL, MySQL, Oracle DB, MongoDB, Redis, Elasticsearch
- **Message brokers:** Kafka, RabbitMQ, Redis Streams
- **Infrastucture:** Docker, Kubernetes, Git, CI/CD
- **Additional experience:** Ruby, Elixir and Erlang

Work Experience

PHP/Go Backend Developer @ *ATi Projects* *November 2022 — August 2026*

Products: an electronic document management system, an internal banking CRM, and a US-to-Kazakhstan delivery service.

- Developed backend functionality and REST APIs for mobile applications and frontend clients across three product systems.
- Diagnosed and resolved SQL issues, including N+1 queries; used indexing and caching to reduce unnecessary data access.
- Developed unit tests using PHPUnit and Pest, conducted code reviews, and participated in legacy code refactoring.
- Worked on the progressive upgrade from PHP 7.2 to 8.3 and from Laravel 5.6 to 12, including resolving compatibility issues in the existing codebase.
- Migrated selected microservices from PHP/Laravel to Go and integrated them into the existing backend environment.
- Developed a dedicated microservice for centralized metrics collection and aggregation.

Technologies: PHP, Laravel, Go, PostgreSQL, MySQL, Redis, Elasticsearch, ClickHouse, Kafka, RabbitMQ, PHPUnit, Pest, Docker, Kubernetes, Git.

Ruby Backend Developer @ *Dualboot Partners* *November 2021 — September 2022*

- Developed backend functionality and REST APIs for a fintech CRM using Ruby on Rails.
- Worked with data access scenarios in PostgreSQL, Redis, and Elasticsearch, including query optimization.
- Participated in refactoring, unit testing, and code review in a distributed team.

Technologies: Ruby, Ruby on Rails, PostgreSQL, Redis, Elasticsearch, REST APIs, Git.

Ruby / Elixir Backend Developer @ *Funbox* *October 2017 — November 2021*

- Developed a backend platform for bulk SMS, push, and email campaigns.
- Worked with Ruby, Elixir/Erlang, external APIs, databases, caching, and logging.
- Participated in application changes related to the infrastructure transition from bare metal to Kubernetes.

Technologies: Ruby, Elixir, Erlang, Phoenix, databases, caching, Kubernetes, Git.

PHP Developer @ *4logist AB* *March — September 2017*

PHP/Symfony, MySQL, Redis, JavaScript, jQuery, Bootstrap.

PHP Developer @ *Sutochno.ru* *February — October 2015*

Backend development for a short-term rental service: PHP, Zend, MySQL, Redis, MongoDB.

PHP Developer @ *ZiMAD* *March 2012 — July 2013*

Backend development for mobile games: PHP, Symfony, Doctrine, MySQL, Memcached, Redis.

PHP Developer @ *X-Cart* *October 2008 — April 2009*

E-commerce store customization: PHP, MySQL, JavaScript.

🎓 Education

Ulyanovsk State University — Information Systems and Technologies, 2001 — 2006
